SUMMARY

Software engineer and product builder focused on building and shipping complete products. Worked across backend systems, product design, integrations, deployment, and iteration through projects like CaptionFX, Topline, Tendr, and production client work.

EDUCATION

B.Tech in Computer Science Engineering | 2024 – 2028 (Expected)
Guru Gobind Singh Indraprastha University (GGSIPU), Delhi

EXPERIENCE

Freelance Full-Stack Developer | Jun 2026 – Jul 2026 | Delhi, India
SVJ Trust | Vedi Collections

- Built and deployed two production websites end to end, from requirements and design to implementation and post-launch support.
- **Vedi Collections:** Built an e-commerce platform with product catalog, order flow, admin panel, and Google Ads conversion tracking using Next.js, FastAPI, and Supabase PostgreSQL.
- **SVJ Trust:** Designed and launched a responsive website for blogs, videos, donations, founder information, book updates, and contact flows.

SELECTED PROJECTS

CaptionFX – Video Captioning & Editing Platform | Python, Speech APIs, ffmpeg, React captionfx.com | x.com/captionfx

- Built and launched a web app where creators upload videos, generate multilingual captions, style them, and export finished captioned videos.
- Built the backend captioning pipeline using speech APIs, word-level transcription, caption formatting, and ffmpeg-based video export.
- Added word-level highlighting, preset styles, animations, Razorpay-based credits, SEO improvements, and reduced database round-trip latency from ~90 ms to ~4 ms.

Topline – Gmail-Native Revenue-Recovery Agent | Python, FastAPI, PostgreSQL, Gmail API, Gemini GitHub

- Built a Gmail-based assistant that helps small businesses track unpaid invoices and prepare reminder emails for owner approval.
- Built Gmail and PDF-based invoice extraction and stored invoice details in PostgreSQL.
- Added payment verification with Razorpay and limited Gemini to tasks like drafting reminders and understanding approval replies.

Tendr – Gamified Productivity App | FastAPI, PostgreSQL, React 19, TypeScript GitHub | Live

- Built a productivity app with tasks, focus sessions, XP, analytics, and a virtual-pet reward system; ranked #66 on Product Hunt on launch day.
- Built 30+ REST APIs for tasks, focus sessions, analytics, and rewards.
- Added email/password auth, OTP verification, Google OAuth2, and JWT-based onboarding.

Video Object Remover – AI Video Inpainting Prototype | SAM2, ProPainter, FastAPI GitHub | Demo

- Built a tool that lets users select an object in a video and remove it across the remaining frames.
- Integrated SAM2 with ProPainter and streamed processing progress using Server-Sent Events.
- Fixed 720p GPU memory issues using fp16 inference and chunked processing.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Backend: FastAPI, REST APIs, SQLAlchemy, Pydantic, SSE, Webhooks, Gmail API
AI & APIs: Gemini API, Speech-to-Text APIs, SAM2, ProPainter
Web / UI: React, Next.js, HTML, CSS
Data & Security: PostgreSQL, Supabase, OAuth2, JWT
Tools: Git, Linux, Vercel, Render, Hugging Face Spaces, Razorpay
